Experiment 9

Hospital Information System Using Zoho Creator

Aim:

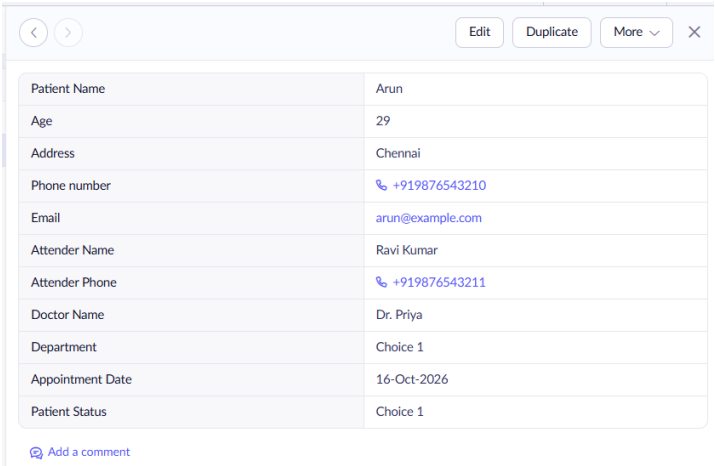

To create a simple cloud-based Hospital Information System for SIMATS Hospital using Zoho Creator to demonstrate Software as a Service (SaaS).

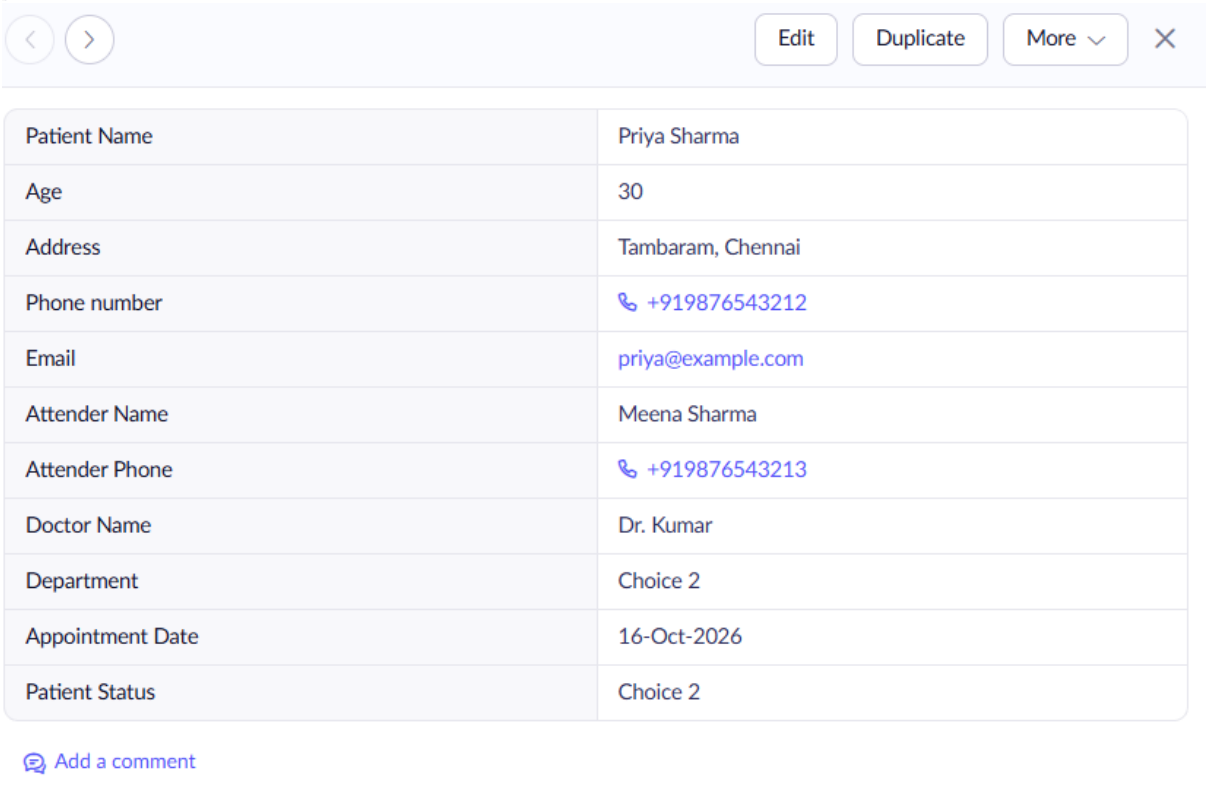

Procedure:

Open Zoho Creator and create an application named SIMATS Hospital Information System.

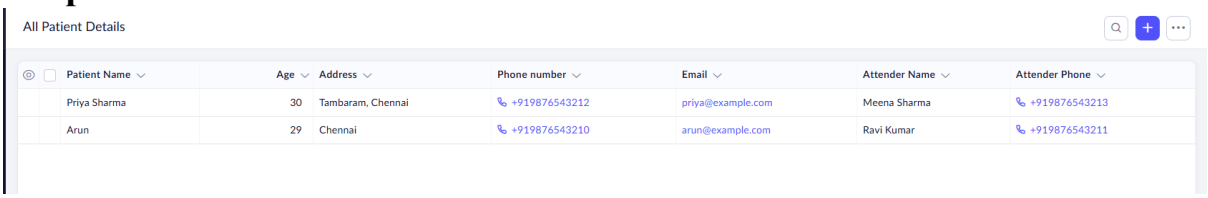

1. Create a form named Patient Details.
2. Add fields for patient name, age, address, phone number, email, attender name, attender phone and doctor name.
3. Add department, appointment date and patient status fields.
4. Configure the dropdown choices and enter sample patient details.
5. Submit the form and verify the saved records in the report.

Input:

Edit
Duplicate
More
Patient Name
Arun
Age
29
Address
Chennai
Phone number
+919876543210
Email
arun@example.com
Attender Name
Ravi Kumar
Attender Phone
+919876543211
Doctor Name
Dr. Priya
Department
Choice 1
Appointment Date
16-Oct-2026
Patient Status
Choice 1
Add a comment

Result:

Thus, a simple cloud-based Student Counselling System was created successfully using Zoho Creator. The application stores student academic details and counselling preferences in the cloud.
