Experiment 10

Student Information System using Zoho Creator

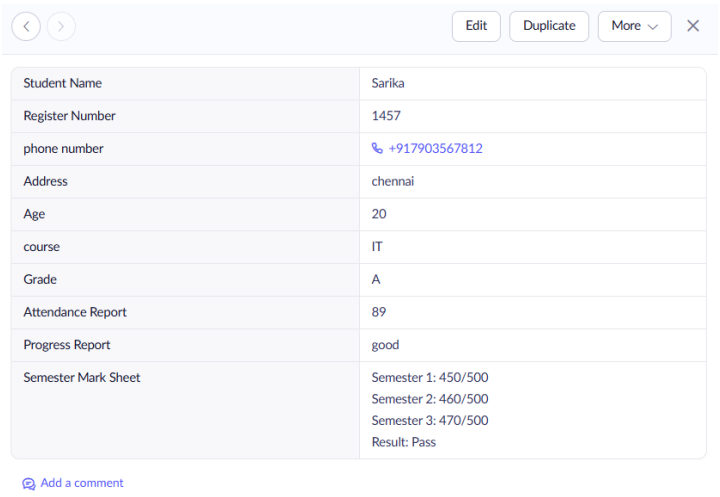

Aim:

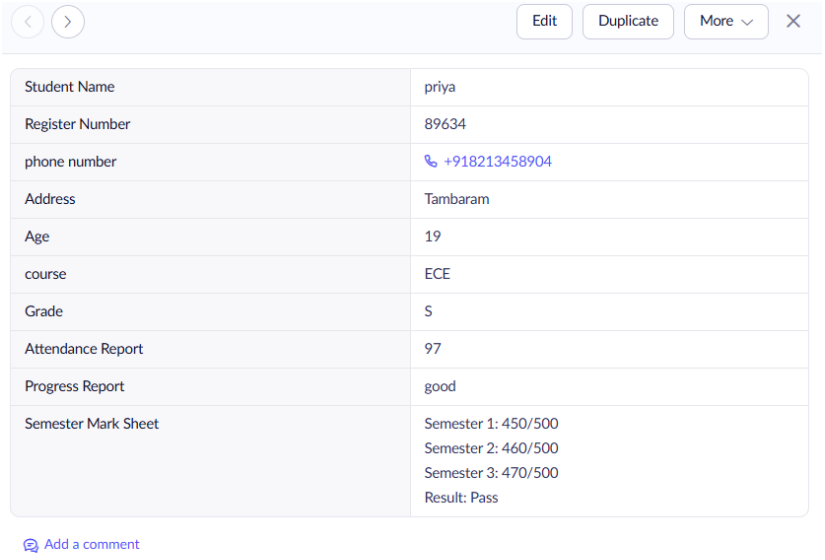

To create a simple cloud software application using Zoho Creator to store and display student information, grades, attendance reports, progress reports, and semester mark sheets.

Procedure:

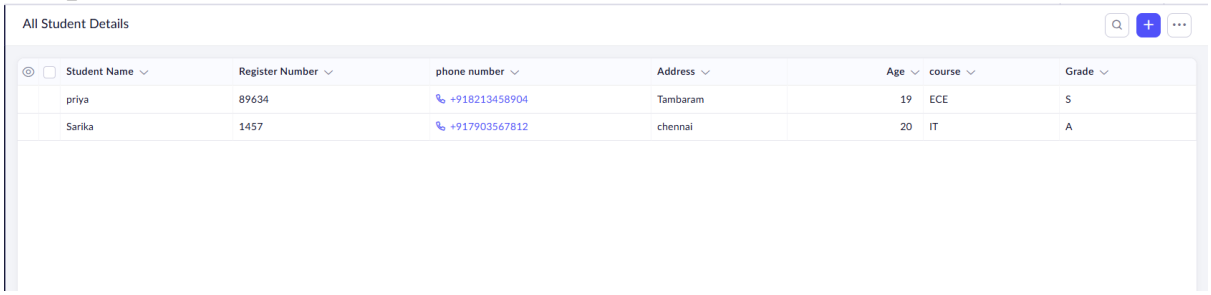

1. Open Zoho Creator and create a new application named Student Information System.
2. Create a form named Student Details.
3. Add fields for student name, register number, address, phone, age, course, grade, attendance, progress report, and semester mark sheet.
4. Set dropdown choices for Course and Grade.
5. Enter sample student details and semester marks.
6. Save the form and view the student records in the report.

Input:

Output:

Result:

Thus, the Student Information System was created using Zoho Creator to store and display student details, grades, attendance, progress reports, and semester mark sheets, demonstrating SaaS (Software as a Service).
