14. Create a Virtual Hard Disk using VMware Workstation

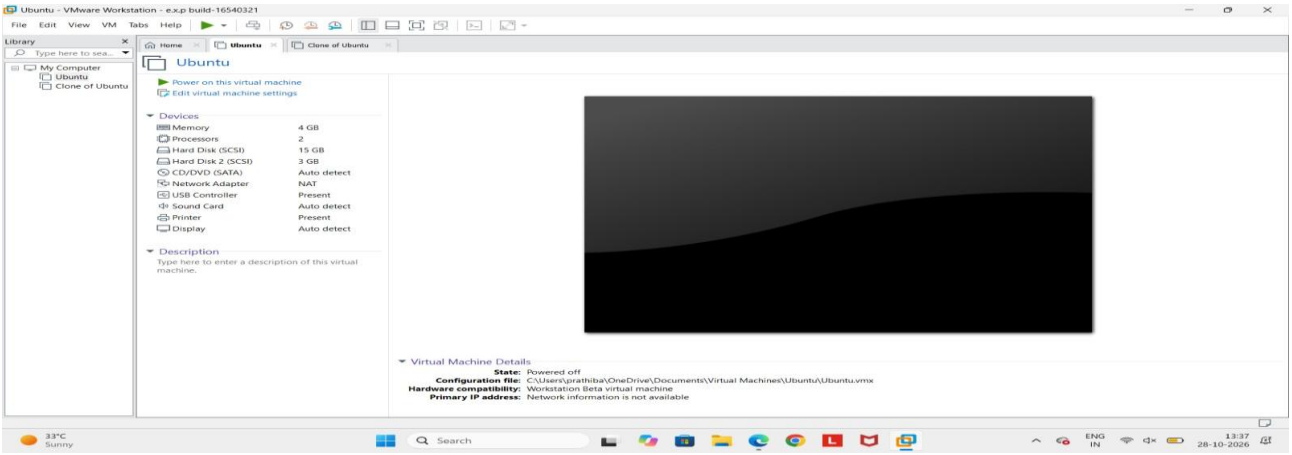

Aim:

To create a Virtual Hard Disk and allocate storage using VMware Workstation.

Procedure:

1. Open VMware Workstation on the computer.
2. Select Create a New Virtual Machine.
3. Choose the operating system installation option and click Next.
4. Select the guest operating system or choose to install it later.
5. Enter the virtual machine name and select the storage location.
6. Specify the virtual hard disk capacity as required.
7. Select the disk type, such as a single file or multiple files.
8. Click Finish to create the virtual machine with the allocated virtual hard disk.
9. Verify the virtual disk settings in the virtual machine configuration.

Output:

Result:

Thus, a Virtual Hard Disk was successfully created and storage was allocated using VMware Workstation.
